

Who We Are

Bocci is a multi-disciplinary consulting firm supplying engineering design, environmental consulting, asset risk mitigation, and construction management. We provide high quality, innovative, responsive and cost-effective technical consulting services globally. Bocci's robust continuous improvement process aligns design, HSE, and economic results.

Concept To Completion

Bocci's team has in-depth experience with utility infrastructure in oil, gas, petrochemical, LNG, pipeline, power, water, waste, industrial & manufacturing process, and thermal central plant and distribution systems. We know that when deciding how to invest capital, "being green" isn't good enough – that's why we combine engineering best practices with sophisticated risk management to provide high level return on investment and improved operability. Bocci's consulting disciplines include; process, risk, mechanical, electrical, environmental, I&C, civil, and structural with a robust team of engineers, analysts, project managers and turn-key construction partners.

Bocci™ ENGINEERING

Sustainable Solutions. Smart Investment.

**Serving industrial, manufacturing,
oil & gas, power, & water/waste
globally for over 7 years**

Utility & Facilities Infrastructure Engineering,
Environmental & Construction Management Services:
Pre-FEED | FEED | EPC | CM & CA | Commissioning

Corporately headquartered in Houston: 713-575-2400
Houston | Pittsburgh | London | Baltimore
Atlanta | Philippines

Bocci™ ENGINEERING

What We Do

CONCEPT

- Operational Optimization
- Combined Heat and Power Assessments
- Major Utility Upgrades and Expansions
- Uninterruptible Power Supplies
- Utility Interconnects
- De-bottlenecking
- Forensic Failure Analysis
- Cost Estimating
- Emissions Inventories
- Regulatory Analysis
- Environmental Compliance Audits

DESIGN

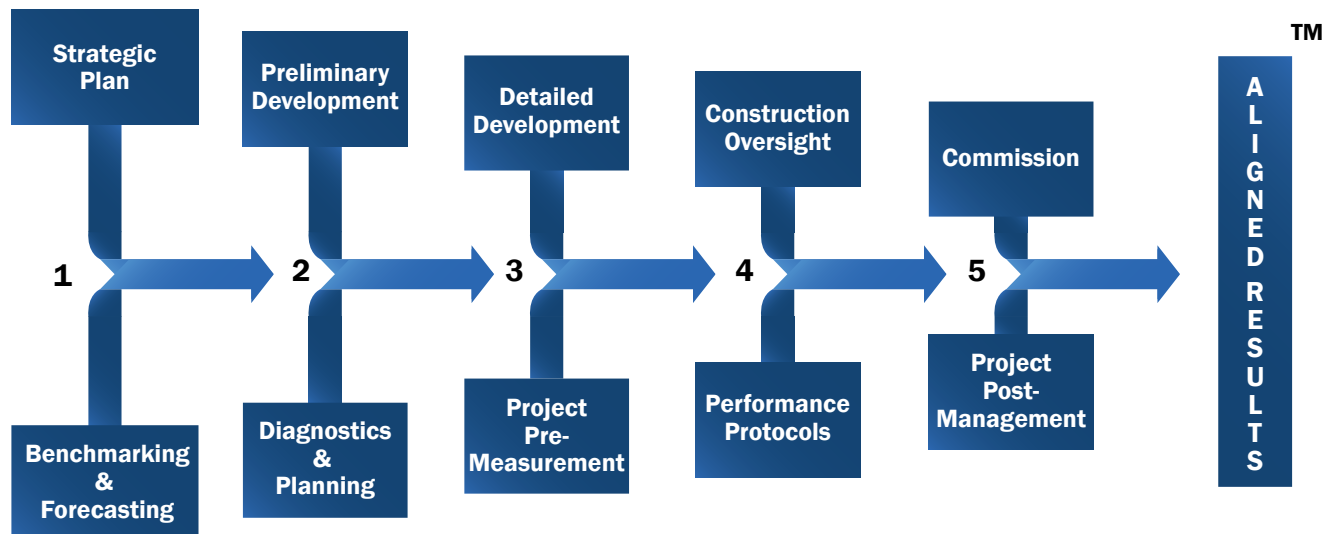

- FEED
- Reliability/Availability/Maintainability Models
- Operability Models
- Construction Documents and Specifications
- Electrical System Studies
- Power Quality Studies
- Flare Reduction
- Air Dispersion Modeling
- Federal and State Air Permit Applications
- NEPA Studies
- Cost Controls and Modeling

COMPLETION

- EPC
- Project Management
- Construction Administration
- Commissioning
- Measurement and Verification
- Training
- As-built Drawings
- Project Job Books
- Field Inspection
- TCEQ/EPA Testing Management
- Utility and Government Incentive Sponsorship

Bocci's Expertise Covers All Major Utility & Facility Infrastructure

Chilled water distribution & production • Environmental control equipment • Instrumentation, controls & automation
 Gas process & compression • Heating, ventilation, air conditioning, clean rooms • Process gases, liquids, storage & HX
 Motors and conveyances • Pipelines & pumping stations • Power generation, distribution, & quality • Power & process boilers
 Refrigeration & compression • Rotating machinery & exhaust • Steam/HW distribution & production
 Water / wastewater treatment & distribution • Fuels/Biomass/Biogas

Industry Experience & Clients

ABB Lummus Global
 Alba LNG - Marathon Oil Company
 Allison Engines
 AMEC
 Bristol Meyers Squibb
 Burnaby LSG - ChevronTexaco
 CenterPoint Energy
 Chevron Technology Ventures
 Cinergy
 City of Houston

Commonwealth Aluminum
 ConocoPhillips-Bechtel
 Enron
 Fed. DOE VAMC
 Fluor
 Gensler
 HCC/HISD Chevron ES
 Honeywell
 IBM
 IGCC - Chevron

KC Brewery
 Kizomba & Sakhalin - ExxonMobil
 LoneStar College
 MagGas Alliance / Conoco
 Marlin TLP - BP
 Maximus Coffee Group
 Oil International Services
 Parsons Engineering
 PepsiCo
 Precision Cast Parts

Schneider Electric
 Siemens
 Syncrude
 TAMU TIPSF Perkins & Will
 Trigen
 UTHSC WHR
 UTMB/TAMU CC - AEI
 Ventech Holdings Inc.
